TORPEDO CHESS

Pawns can always double-move, not just from their starting rank. Dramatically accelerates pawn play in the middlegame and endgame.

Torpedo Chess — starting position

SETUP

Board: Standard 8×8.

Setup: Standard chess setup.

FEN: rnbqkbnr/pppppppp/8/8/8/8/PPPPPPPP/RNBQKBNR w KQkq - 0 1

RULES

Identical to standard chess except:

- ♦ Pawns may advance two squares from ANY rank (not just their starting rank), provided both squares are empty.
- ♦ En passant applies whenever a pawn double-moves past an enemy pawn, regardless of which rank it starts from.
- ♦ All other rules unchanged.

WIN CONDITION

Checkmate.

STRATEGY

Passed pawns become much more dangerous because they can sprint two squares at a time. Pawn endgames are sharply different — a pawn on the 5th rank can reach promotion in two moves instead of three. Blockading passed pawns is more difficult. Connected pawns rolling forward together are extremely powerful.
